

AMENDMENT TO THE CLAIMS

Please amend the claims as shown below in the listing of the claims. The listing below replaces all previous listings of the claims.

1.-28. (Cancelled)

29. (New) A protective garment comprising:
an integrally formed garment body of a liquid impermeable material having an inner surface;
fibres affixed to at least a part of the inner surface of the integrally formed garment body; and
an adjustment device associated with the garment body to adjust the protective garment on a wearer.

30. (New) A protective garment according to claim 29, wherein the garment body has areas of different thicknesses.

31. (New) A protective garment according to claim 29, further comprising a connector associated with the integrally formed garment body; and a tubing connected to the integrally formed garment body by the connector.

32. (New) A protective garment according to claim 29, wherein the adjustment device is a strap, snap, clip, or fastener.

33. (New) A protective garment according to claim 29, further comprising an absorptive device associated with the inner surface of the integrally formed garment body.

34. (New) A protective garment according to claim 33, wherein the absorptive device is an absorptive material or absorptive pad.

35. (New) A protective garment according to claim 29, wherein the surface of the integrally formed garment body has a first portion and a second portion.

36. (New) A protective garment according to claim 35, wherein said first portion of the surface is formed with multiple perforations to permit passage of perspiration therethrough.

37. (New) A protective garment according to claim 35, wherein the second portion of the surface is not substantially perforated so as to prevent passage of body fluids therethrough.

38. (New) A protective garment according to claim 35, wherein an absorptive device is associated with the second portion of the inner surface of the integrally formed garment body.

39. (New) A protective garment according to claim 38, wherein the second portion extends beyond said absorptive device.

40. (New) A protective garment according to claim 38, wherein the absorptive device extends beyond the second portion.

41. (New) A protective garment according to claim 33, wherein the fibres are proximate to the portion of the garment body associated with the absorptive device.

42. (New) A protective garment according to claim 29, wherein the integrally formed garment body has an outer surface, and
further comprising fibres affixed to at least a part of the outer surface of the integrally formed garment body.

43. (New) A protective garment according to claim 29, wherein the garment is a body-tight seamless garment.

44. (New) A protective garment according to claim 29, wherein the garment is an undergarment or a dressing.

45. (New) A protective garment according to claim 44, wherein said undergarment is underpants or a brassiere.

46. (New) A protective garment according to claim 44, wherein the dressing is a bandage or dressing pad.

47. (New) A protective garment according to claim 29, wherein the liquid impermeable material is a natural or synthetic elastomer.

48. (New) A protective garment according to claim 47, wherein the liquid impermeable material and/or the fibers comprise at least one pigment, dye, or a combination thereof.

49. (New) A protective garment according to claim 47, wherein the liquid impermeable material and/or the fibre comprise at least one fragrance.

50. (New) A protective garment according to claim 29, further comprising an embossed design or pattern.

51. (New) A protective garment according to claim 31, wherein the connector is associated with an absorptive material.

52. (New) A protective garment according to claim 31, wherein the tubing can absorb or transport fluids away from the body.

53. (New) A protective garment according to claim 31, wherein the tubing can transmit liquid to the body.

54. (New) A protective garment according to claim 31, wherein the connector is integrally formed with the garment body.

55. (New) A protective garment according to claim 31, wherein the connector is separate from, but attached to, the garment body.

56. (New) A protective garment according to claim 31, wherein the connector is composed of a liquid impermeable material, wherein the liquid impermeable material is a natural elastomer or a synthetic elastomer.

57. (New) A protective garment according to claim 31, wherein the garment body has a tear region.
